

## Winners of the Postdoctoral Distinguished Mentor Award

| Year | Name                    | Org      | Nominated For   |
|------|-------------------------|----------|---|
| 2011 | Christine Anderson-Cook | CCS-6    | Providing guidance on how to conduct good research, but more importantly she takes a personal interest in the success of her postdocs and provides support, inspiration and advice on their career planning and personal development.   |
|      | Andrew Dattelbaum       | MPA-CINT | Having clear vision on how to shape a postdoc's career. He is always available and always encourages independent thinking and gives his postdocs the liberty to suggest new ideas and different research directions; has confidence in his postdocs and provides an environment for independence; and encourages collaborations.  |
|      | Rico Del Sesto          | MPA-MC   | Having a natural and motivational leadership style that promotes professional development of postdocs. He offers learning opportunities, is always available for discussions, facilitates the publication process, and develops collaborations with scientists in the postdoc's research area.  |
|      | Jen Martinez            | MPA-CINT | Her mentoring skill, enthusiasm for science, research achievements, and most importantly, her concern and care for her postdocs. She provides her advisees with the skills and experience needed to enable them to pursue their independent aspirations.  |
|      | David Moulton           | T-5      | David is the standard for a good postdoc advisor in his professional and career development, political and funding insulation, and academic guidance. He guides his postdocs towards acquiring valuable technical and non-technical skills necessary for a successful career, helps chart a career path from the early stages, and helps to find the ideal placement for the postdoc.   |
|      | Tom Picraux             | MPA-CINT | Raising the bar on the concept of hard work, true effort, and deep dedication. His passion for science and love for learning is contagious, and instills in his postdocs the desire to "pass it on." Tom has an extraordinary insight into people. His ability to identify talent and enthusiasm, and then to create the conditions in which it will thrive, are most remarkable.   |
| 2010 | Quanxi Jia              | MPA-CINT | Providing scientific guidance as well as the knowledge and skills to handle situations that cannot be learned by working in a laboratory.   |
|      | Tom Intrator            | P-24     | Deeply passionate about preparing his postdocs for productive and rewarding careers as scientists and an unwavering commitment to his postdocs, encouraging their independence, while being available for consultation and feedback.  |
|      | James Werner            | MPA-CINT | Providing excellent support and leadership to his postdocs and is genuinely concerned about providing a positive work environment. Makes it a priority to sit down with his postdocs and teach them things that they might not have experience in. Never hesitates to give a postdoc the recognition for their work. Actively involved in his postdoc's job search for their next appointment, and in providing guidance regarding their future career opportunities. |
